Hands-on Disruption:
Experimenting with Emerging Tech (VR + Journalism)

This award-winning course returns in the fall empowering students to create non-fiction, immersive experiences using the latest technology, which includes 360 video, Virtual Reality, Augmented Reality and more.

We have worked with news organizations like The New York Times, NPR, ProPublica and many others producing stories ranging from the environmental threat at the Salton Sea to the presidential inauguration and women's march to roller derby.

The New York Times
